

## Nature's Oxymoron

An oxymoron is a combination of contradictory words (like "Jumbo Shrimp" or "Deafening Silence")... opposites that are used together.

A tree can be **dead** but **alive**.

An insect can be **delicate** but **dangerous**.

Your Challenge:

Go for a hike or a walk or a stroll or a sit spot. As you wander or sit, find opposite traits in the same thing...

Find one thing that is...

Young and Old	
Dead and Alive	
Weak yet Strong	
Soft and Hard	
Still but Moving	
Delicate but Dangerous	

This can be done all at once or over the course of a longer period. Extra challenge, make your own opposites!
